

Abbott - Manufacturing Technician

SETU Careers Development Centre - Jobs Board

Location: Kilkenny Business and Technology Park, Kilkenny, Ireland

Company: Abbott Diabetes Care

Overview

Abbott is recruiting Manufacturing Technicians for its advanced Diabetes Care manufacturing facility in Kilkenny. The site produces FreeStyle glucose monitoring technology used by millions worldwide. This role offers hands-on technical work, structured training, and long-term career progression opportunities.

Key Responsibilities

- Perform preventative maintenance, fault diagnosis and repairs on production equipment.
- Troubleshoot mechanical, electrical and pneumatic systems.
- Monitor machine performance and support efficiency and yield targets.
- Use CMMS and production data to identify issues and improve performance.
- Support continuous improvement and root cause analysis activities.
- Assist with equipment installation, validation and upgrades.
- Train and support operators on production equipment.
- Collaborate with engineering, quality and operations teams.

Candidate Requirements

- Level 6 qualification or higher in a technical or engineering discipline.
- Mechanical and/or electrical skills.
- Strong problem-solving and troubleshooting ability.
- Interest or experience in automation and manufacturing.
- Safety-first and quality-focused mindset.
- Good teamwork and communication skills.

Career Development

- Progression opportunities to senior and specialist technical roles.
- Exposure to automation, maintenance and engineering disciplines.
- Opportunity to contribute to a growing global healthcare operation.

How to Apply

Applications must be submitted through the Abbott Careers website using the link below:
