WHY CHOOSE SETU FOR POSTGRADUATE STUDY?

South East Technological University (SETU) is the university for Ireland's southeast region, with campuses across Carlow, Waterford and Wexford. SETU serves over 18,000 students and employs more than 1,500 staff, making it a vibrant leader in higher education and research. SETU plays a vital role in regional and national growth, with latest research indicating it generates a €1.05 billion contribution to the Irish economy.

At SETU, postgraduate study is more than just academic work, it is immersion into a vibrant community of researchers, innovators, industry collaborators, and entrepreneurs coming together in a supportive environment. With its multi-campus reach and state-of-the-art facilities, SETU offers opportunities to engage in interdisciplinary research that contributes to regional, national, and global growth, innovation, and development.

SETU offers a wide range of high quality taught and research postgraduate programmes across our campuses that provide qualified primary degree holders (NFQ level 8) with exciting opportunities to progress to higher awards, at NFQ Level 9 (masters) and NFQ Level 10 (doctorates). These opportunities may be undertaken by research or thesis, or through taught programmes. Programmes are available in full-time and/or part-time modes across campuses.

Whether you are pursuing a structured PhD or a master's, SETU provides a supportive, well-resourced, and forward-looking environment that fosters academic excellence, real-world impact, and meaningful career development.

HOW TO APPLY FOR TAUGHT POSTGRADUATE PROGRAMMES AT SETU

Ready to apply?

Applications are made through the SETU Online Application Portal, accessible directly from each programme page on the postgraduate section of our website. Further information is available at www.setu.ie/postgrad or follow the QR code.

Timelines

Applications are accepted on a rolling basis for January and September intakes. January entry usually opens in October or November, while September entry typically opens in November or December. Timelines can differ by programme, so you should always check the individual programme page for the most accurate information.

Required Documents

For taught postgraduate applications you will typically need a full transcript of your bachelor's degree, a copy of your degree certificate, and, if applicable, evidence of English language proficiency. If your documents are in a language other than English, you must supply certified translations along with the originals.

Fees and Payment

There is a €35 non-refundable application fee payable when submitting your application.

Tuition fees vary by programme and each year they are reviewed. You must pay at least 50% of the total fee at registration (or pay in full), with the remainder due by 31 January of the academic year. For more information go to the postgraduate fees section on our website or follow the QR code.

FUNDING YOUR POSTGRADUATE STUDY

Funding is a major factor in planning postgraduate study, but many supports and opportunities exist. With early planning and awareness of available options, you can find programmes that ease financial pressure and make postgraduate study more manageable.

Postgraduate Funding SUSI Supports

Students enrolling in a postgraduate programme at SETU may be eligible for financial support through the national student grant scheme, administered by SUSI. For many considering further study, funding is an important factor, and the SUSI scheme offers a range of supports designed to ease the cost of postgraduate education.

Depending on your reckonable household income, you may qualify for either a postgraduate fee contribution or a postgraduate fee grant. Eligible students can receive a fee contribution of up to €4,500, or a fee grant of up to €6,270, which may also include a maintenance grant.

Applying for a SUSI grant is straightforward. New applicants can create an account on the SUSI website and complete the online application form, which covers personal details, residency, course information, household income and dependent family members. Before applying, ensure you have relevant PPSNs and income details ready. Visit www.susi.ie for more information.

Springboard+ Funded Courses

SETU offers Springboard+ courses across various campuses in a number of disciplines including built environment, business, computing, engineering, science, hospitality and media.

Springboard+ offers Free / 90% funded higher education courses – typically one year or less - in areas where skills are in great demand in the Irish economy. From 2025, micro-credential courses will be encompassed under the Springboard+ programme. These courses are designed to meet the needs of employed applicants who wish to upskill over a shorter timeframe. All SETU courses are part-time and are delivered in flexible modes designed to maximise access including for people who are working.

Springboard+ Funding

Springboard+ has very strict requirements around proof of eligibility. While a provisional offer of a place may be made – subject to academic eligibility – it is recommended to check www.springboardcourses.ie/eligibility to ensure you meet the requirements.

All candidates, without exception, will be required to upload the required documentation to the www.springboardcourses.ie site within the specified time windows in order to gain a funded place.

Full information on eligibility is available at: www.springboardcourses.ie/eligibility

CONTACTS AND SUPPORT

Specific programme queries can be answered by the programme directors listed on the individual course pages.

www.setu.ie/postgrad

If you have questions about your application or need help:

- For Waterford campus taught postgraduate enquiries, email: tpgadmissions.wd@setu.ie
- For Carlow and Wexford campus taught postgraduate enquiries, email: tpgadmissions.cw@setu.ie

PHD AND RESEARCH COURSES

SETU offers a supportive and vibrant environment for postgraduate researchers across a wide range of disciplines. SETU's structured PhD offers a 48-month Level 10 degree. Candidates undertake an original, substantive research project under the guidance of a supervisory panel, while also completing 30 European Credit Transfer and Accumulation System (ECTS) of taught modules. This includes a mandatory module in Research Integrity and Ethics (5 ECTS), with the remaining credits drawn from a tailored combination of universal and project-specific pathway modules. Students benefit from a clear training framework, access to experienced supervisors, and a formal confirmation process that supports strong progress throughout their research journey. As a research-active university with recognised excellence in researcher support, SETU provides access to leading research groups, state-of-the-art facilities, and broad professional development opportunities that help researchers build the skills and confidence needed for successful careers.

Applications can be submitted through open competition via SETU's Funded Research Opportunities webpage.

Self-funded applicants can find information on SETU's Research Funding Opportunities webpage.

Any prospective self-funded applicants must secure an SETU supervisor before applying for the PhD programme. Any queries can be addressed to the Research Support Team via research@setu.ie where the team will be happy to assist.

STUDENT STORIES

Liam Whelan

Master of Science in Supply Chain Management

I'm so grateful for my time at SETU. It is because of the University's strong connection with industry that I am now

in an exciting role gaining invaluable experience and developing my career. I completed a 10-week internship within the supply chain industry. Eaton had a longstanding internship programme established with SETU, which was highlighted to me by my lecturers. I was delighted at the opportunity to gain experience with a company working on an international scale. I was supported throughout my time at SETU by all my lecturers. I was given amazing opportunities to progress my career once I finished my degree. I also made lifelong friends during my time at SETU who I keep in regular contact with today.

Dikshitkumar Khamar

Executive MBA

The immediate impact after studying this programme was the promotion that I received, and this course has

helped me to prepare for this. In terms of lasting impact, the course has helped me be more self-aware, understanding of different leadership styles and has given me the ability to make the most out of any situation. I feel the course has made me more spontaneous. I guess this happens when one is equipped with the right tools and better self-awareness.

STUDENT STORIES

George Bell

Master of Science in Strength and Conditioning

I found my experience at SETU highly rewarding and would readily endorse it to prospective students. The structure allowed me to complete my coaching badges alongside my studies, and I was trained daily like a professional. The skills acquired and professional networks established contributed to my current position at Portsmouth FC.

Róisín Kirwan

Master of Science in Sport & Exercise Psychology

The constant feedback, encouragement, and understanding from my lecturers made a huge difference. The scholarship programme also gave me the flexibility to balance my academic work with playing senior camogie, while being surrounded by other driven athletes in a high-performance environment motivated me to keep improving every day.

Vivian Ibeto

Master of Business in Finance and Business Analytics

I believe the knowledge base I built from the varied modules included in this masters helped me to secure a summer internship at Ernst and Young (EY), one of the 'big four' accounting firms. Applying the skills and knowledge obtained at SETU in a real-world setting reinforced the practical value of my studies and will certainly prepare me for future challenges. I would also suggest that SETU students explore the resources

available to them – the people at Student Life and Learning are brilliant and always at hand to support your academic growth.

Mark O'Brien

Master of Arts in Management in Education

I am a proud graduate of the MA Management in Education (MAME) and a GPA Scholarship recipient in 2023/24. The MAME has been transformative for me, equipping me with essential leadership skills and knowledge. The excellent lecturers and diversity of classmates from primary, secondary, Further and Higher Education enriched my learning experience. Also, the flexible, blended learning format was perfect for helping me to balance

Mehak Diwan

Master of Science in Construction Project Management

I found the course structure to be greatly beneficial as we had a mix of coursework projects to complete along with essay-based assignments. I also enjoyed the practical IT workshops, which largely revolved around mastering MS Project, a planning software. SETU's lecturing staff are very friendly in my experience and always open to answering any doubts. I'm grateful that the course's flexibility allowed us to choose our topics of interest while still providing guidance from start to finish.

my career and studies. The skills I have gained are transferable to all aspects of life, not just in school. The MAME has truly transformed me as a teacher and as a person, allowing me to lead with confidence and advance my career in education. I would highly recommend it.

STUDENT STORIES

Glauber Carneiro

Postgraduate Diploma in Digital Marketing Practice

I was particularly drawn to SETU's practical approach to learning, which promised to bridge any gaps

between my existing knowledge and emerging digital marketing trends. The programme has significantly enhanced my professional skills. Beyond just learning new digital marketing concepts, I've gained confidence in implementing advanced strategies and analysing their effectiveness, and the practical nature of the coursework meant I could immediately apply new learnings to real-world scenarios. The flexibility of online learning was perfect for my professional commitments, allowing me to balance work, study, and personal life seamlessly.

Philip Connors

PhD in Sport Science and Coaching

I really liked how practical the research was. It allowed me to gain experience among my peers and learn more

about the research process. I really enjoyed the experience of working alongside high-level, inter-county sporting teams. Although the research was on an individual basis, there was a good network of researchers based in the Dargan Centre on campus in Carlow. There were lots of opportunities to collaborate and discuss research methods and ideas. My supervisors were brilliant. They provided me with great support throughout my time studying and provided feedback along the way.
