

## Sustainability in Education

(10 Credits, Level 9)

<b>Aim of Module</b>	This module aims to provide a background to the issues concerned with environmental sustainability in educational establishments. It identifies the existing policies and initiatives concerned with sustainability in the education sector and how these can best be implemented in individual educational settings. Further to this, guidelines and advice will enable the learners to develop policies for implementation in their own organisations.
<b>Module Learning Outcomes</b>	On successful completion of this module, you will be able to: <ul style="list-style-type: none"><li>• Develop a systematic understanding of the main environmental and sustainability issues within an educational setting</li><li>• Critically evaluate existing policies and initiatives in relation to sustainability in the education sector</li><li>• Develop research techniques and skills to evaluate the environmental issues within a chosen educational setting</li><li>• Critically evaluate the current biodiversity and utilisation of school grounds for environmental education and awareness</li><li>• Synthesise current literature and research for the development of new environmental and sustainability policies for the chosen educational setting.</li></ul>
<b>Mode of Assessment</b>	100% Continuous Assessment
